

Privacy Policy for WA Message to Post

Effective Date: June 14, 2026

Welcome to **WA Message to Post** ("we," "our," or "the App"). We are committed to protecting your privacy. This Privacy Policy explains how we handle, process, and protect the information data when you use our application to forward messages from a WhatsApp group to a Facebook Page.

1. Information We Collect and Process

Because the App's sole purpose is to automate cross-platform posting, we only process the minimum data required to perform this function:

- **Administrator Message Content:** We access the text, images, or media posted exclusively by the group administrator within the linked WhatsApp group.
- **Access Tokens and Permissions:** We collect and store secure API access tokens provided by Meta to authorize the reading of WhatsApp messages and the posting of content to your designated Facebook Page.

Important Note on Group Members: Because the connected WhatsApp group is configured to restrict messaging permissions exclusively to the administrator, **the App does not collect, read, or process any personal data, messages, or information from regular group members or subscribers.**

2. How We Use the Information

We use the collected data strictly to execute the core functionality of the App. Specifically:

- To detect new broadcast messages sent by the administrator in the designated WhatsApp group.
- To automatically format and publish those exact messages to your selected Facebook Page.

We **do not** use this data for marketing, profiling, advertising, or any other secondary purposes.

3. Data Sharing and Disclosure

We value your privacy and do not sell, trade, or rent your information to third parties. Your data is only shared with:

- **Meta Platforms, Inc. (WhatsApp & Facebook):** Data is transmitted back through Meta's official APIs to complete the posting process on your Facebook Page.

- **Legal Compliance:** We may disclose information if required to do so by law or in response to valid requests by public authorities.

4. Data Retention and Deletion

- **Transient Processing:** Message content is processed in real-time. Once a message is successfully posted to your Facebook Page, it is not stored or archived on our servers.
- **Token Retention:** Secure access tokens are stored safely until you choose to disconnect the App or revoke its permissions.
- **User Data Deletion:** You can request the deletion of your account configuration, stored access tokens, or operational logs at any time by contacting us at the email address below.

5. Contact Us

If you have any questions about this Privacy Policy or wish to issue a data deletion request, please contact us at:

- **Email:** ebrahim_karam@hotmail.com / st.joseph.parish.baskinta@gmail.com
